

Eligibility accuracy at the speed your caseload now demands.

A risk score for every case, the factors behind it, and the sources that support it. The determination stays with you.

2×

THE ELIGIBILITY WORK

Six-month renewals for expansion adults begin January 1, 2027.

Oct 1

NARROWER RULES, IN EFFECT

Immigrant-eligibility limits took effect October 1, 2026; work and address checks follow.

1 week

TO FIRST FINDINGS

Initial results on a 1,200-case sample within about a week of a usable file.

HOW CASEVUE WORKS

Verify. Score. Explain. Decide.

- 1 **Intake**
Your case data arrives by secure transfer, under a data agreement your agency controls.
- 2 **Verify**
Each case is checked against authorized third-party data: identity, residency, household, income, resources, and other coverage.
- 3 **Score**
Every case gets a risk score, the factors behind it, and the sources — verified, discrepant, or missing, at a glance.
- 4 **Decide**
Your staff act on a prioritized, documented picture. The determination stays with the agency.

THE DEMONSTRATION

1,200 cases. One week. Your population.

You choose the population — Medicaid or SNAP. We agree the data, scope, and schedule before anything moves. Fixed fee; broader use is scoped separately.

You receive

- A scored assessment for every record, with factors and sources
- A findings report: discrepancies, gaps, and differences from current determinations
- Where manual review can be reduced
- A working session with your eligibility and program-integrity staff

No system replacement. CaseVue informs; it never decides.

THIRTY YEARS INSIDE STATE PROGRAMS. ONE NAME FOR IT NOW.

Built more than thirty years ago by CoverMe's founder, a former state health and human services commissioner, this process has run inside state Medicaid, long-term care, and food-assistance programs ever since, under agency names rather than ours. CaseVue puts one name on it.

Ready to see it on your own cases? Contact us to schedule a demonstration.
