# Hidden revenue is out there.

UNCOVER IT WITH COVERME RETROCHECK.

Look back on your self-pay patient data so you can move forward with collecting payments. With **CoverMe RetroCheck**, you can easily identify billable Medicaid, Medicare, and commercial insurances previously unknown or forgotten by the patient. This will further help reduce the overall collection costs.

CoverMe's web-based platform has helped numerous healthcare facilities find hidden health insurance coverage.

CoverMe clients have experienced the following success:

$200M in charge conversions on self-pay accounts.

30% of self-pay patients converted to Medicaid coverage in real-time.

90% entered into **CoverMe** Marketplace found a payment solution.

How **CoverMe** RetroCheck works

Real-time data assessments to validate self-pay status and ensure accurate patient demographic and insurance information.

Screens patients for Medicaid coverage options and commercial payer sources.

Providers are able to find missing coverage to get paid for self-pay claims and help patients discover unknown coverage options.

Count on RetroCheck:

- ✓ Maximize insurance reimbursement revenue by identifying primary, secondary and tertiary coverage

- ✓ Utilize RetroCheck anywhere within your revenue cycle

- ✓ Mitigate the rising cost of deductibles

- ✓ Recapture reimbursements from 90 days to one year post-discharge

- ✓ Reduce expenses and labor costs associated with self-pay receivables

- ✓ Able to set up and launch within hours….not weeks!

Never let another coverage opportunity slip away. Find hidden revenue and maximize your reimbursements by implementing CoverMe RetroCheck.
